

Northern England
Strategic Clinical Networks

Welcome to the first joint educational meeting organised by the North East Paediatric Anaesthetic Network in conjunction with the Northern Children's Surgery Network and Northern England Strategic Clinical Networks. We hope you'll enjoy the educational content of the day, and the opportunity to meet others from our allied paediatric disciplines.

After a morning of cross-specialty lectures, the first session of the afternoon has three parallel streams of lectures loosely themed by specialty. There is a 5-minute gap between each of these, and we hope you will take the opportunity to move between streams if desired according to your interests. The final session of the day is a Clinical Conundrums session involving a panel of experts from a wide range of specialties and hospitals who will be answering questions submitted by delegates.

Codes in red refer to the RCOA CPD matrix codes applicable to each lecture.

| NEPAN / NCSN JOINT REGIONAL MEETING HARDWICK HALL, APRIL 22ND 2015 | |
